## UNLIMITED PASSION

Since MUGEN was founded in 1973, we have striven to deliver the kind of unlimited performance levels envisaged by our founder Hirotoishi Honda, son of Honda founder Soichiro Honda. Our focus and dedication has resulted in MUGEN engines powering hundreds of race and championship winners.

Beginning with the very first Civic and also Off-Road motorcycles, MUGEN Power has been honed in the crucible of world motorsport. Our recent history includes competition in all areas of automobile racing, including rally and touring cars, single-make series such as the Civic Type R championships in Japan, Le Mans Sports prototypes, GT racing and the pinnacle of motorsport, Formula 1.

At MUGEN we also design and develop race engines under our own brand name, the most prominent of these being the MF458S LMP1 unit, which is a race winner in the Japanese Le Mans Series.

Our unrelenting desire for unlimited performance, backed by our world class expertise and facilities, means the only 'standard' you will find at MUGEN is the one we set for others to try and follow.

We recommend that MUGEN ORIGINAL PARTS are fitted by an authorised MUGEN dealer.  
Note: product warranty conditions vary for specific parts. Please ask your MUGEN dealer for details.

### MUGEN SPORTS SUSPENSION KIT

Perfectly matched set of dampers and springs with pre-set damper valve and spring rate settings tuned to the Honda Civic Type R, for fully controlled ride and handling. Developed extensively in Japan, but refined for the UK roads. Gives increased feedback to the driver from the front and rear of the car.

PN / 50000-XLR-KDS0

**BRAKE RESERVOIR COVER**

Maintains the temperature of the brake fluid for more consistent brake feel. Also effectively absorbs any unwanted fluid spillage.

PN / 90000-YZ7-0054

**RADIATOR CAP 1.3 bar**

Essential for improved cooling of any tuned engine, increasing the pressure in the cooling system from the standard 1.1 bar to 1.3 bar. The higher pressure raises the water boiling point, therefore allowing more heat to be extracted from the engine.

PN / 19045-XGER-0000

**CARBON IGNITION COIL COVER**

High quality and lightweight dry carbon component constructed using layered pre-preg carbon for an ultra-smooth finish and seamless fitting.

PN / 12500-XK2B-K0S0

**TYPE R**  
**無限 MUGEN**

**MUGEN REAR WING**

Easy-fit wing with 2-position adjustable downforce settings, for eliminating lift and enhancing stability at speed. The distinctive shape and Mugen badging create the instantly recognisable MUGEN Civic look.

PN / 84112-XLR-K0S0\*

**MUGEN UNDER SPOILERS**

Derived from touring car experience, these aggressively styled aero components are seamless extensions of the standard OEM bodywork. The rear under spoiler replaces the standard triangular exhaust ports with large circular heat shields and a diffuser section smoothes the air flow exiting the underside of the car and aids downforce.

FRONT - PN / 71110-XLRZ-K0S0-ZZ\*

REAR - PN / 841110-XLRZ-K0S0-ZZ\*

\*Available July 2010

### GP FORGED ALUMINIUM WHEELS

7.5J x 18" aluminium wheels with a 5kg weight saving per corner over standard wheels. Precision manufactured using high pressure forging rather than traditional casting for exceptional quality and a superior finish. Please ensure only wheel nuts with the correct seating angle are used on these wheels. MUGEN recommends our Heptagon Wheel Nuts (shown right).

BRONZE – PN/42700-XXA-875B-55

GUN METALLIC – PN/42700-XXA-875G-55

### HEPTAGON WHEEL NUTS

7-sided chrome vanadium wheel nuts for increased strength and security, with the correct seat angle to perfectly match our GP wheels. Set also includes locking nuts for added security.

PN /08181-XXB-K0S0-BL

### MUGEN SPORTS BRAKE PADS

More resistant to fade under extreme heat conditions, for greater consistency and longevity under hard braking. Improves the performance and feel of standard calipers.

FRONT – PN/45022-XLR-K000

REAR – PN/43022-XKS-K000

### QUICK SHIFTER

Reduces the throw of the gear lever for quicker and smoother gear changes, with a significant enhancement in positive shifting and increased direct shift feel.

PN/54000-XXPE-K0S0

### ALUMINIUM GEAR KNOB

The increased weight over the standard OEM part is strategically positioned to aid slicker gear changes and give a more positive shift feedback.

PN/54102-XG8-K1S0-S6

### ALUMINIUM OIL FILLER CAP

Identical to the filler caps used on our race engines, these superior quality machined aluminium components are manufactured individually to the same high precision as all our original parts. Available in 5 anodised colours.

PN/15610-XG8-K1S0

**MUGEN POWER LANYARD**

PN / 90000-XYD-111B

**MUGEN NUMBER PLATE BOLTS**

PN / 75700-XG8-K0S0

**MUGEN WATERPROOF PONCHO**

PN / 90000-XYD-125A

**無限 MUGEN**

**MUGEN BATH TOWEL**

PN / 90000-XYD-555A

**MUGEN CAP**

PN / 90000-XYD-500A

**MUGEN POWER MESH CAP**

PN / 90000-XYD-503A

**MUGEN METAL EMBLEM**

WHITE - PN / 90000-YZ8-DV62-WH
