

CIVIC

TYPE R

Make an impression in the company car park

The moment drivers set eyes on the big red start button in the racing inspired Civic Type R, pulses begin to race.

Over 40 years of engineering passion has gone into the highly tuned Type R. The 2.0 i-VTEC engine is highly responsive, and the sporty exterior and interior styling complement its exhilarating driving performance.

Yet for a car that delivers such exhilarating performance, the Type R has surprisingly sensible running costs. It is also practical too. For example the boot offers a roomy capacity of 485 litres, which increases to 1,352 litres with the rear seats folded flat.

The Type R is practical and affordable, without compromising on performance.

Type R GT

- 18" alloy wheels
- Body coloured aero kit
- Type R alcantara sports seats
- Type R sports suspension
- HID xenon headlights
- Dual zone climate control
- Cruise control
- Auto wipers
- Auto headlights
