

NHS Just what the doctor ordered

“...you get a very stylish small car that feels as big on the inside as a family hatchback. And of course the legendary Honda reliability and value retention.”
The Sun

SMALL IS BIG

The Jazz is designed to be compact on the outside, yet spacious and versatile on the inside.

The short nose and rear-end give the Jazz an incredibly tight turning circle and open up even the smallest parking spaces.

At the same time, the longer wheelbase and compact engine bay free up even more cabin space for both driver and passengers. There are also plenty of flexible storage options, with folding magic seats and 883 litres of boot capacity with the seats down (litres, VDA method) - including an innovative two-tier shelving system on 1.4 grades.

MAGIC SEATS

From a row of comfortably contoured rear seats to a large new storage space big enough for a bicycle, all in seconds. This is design flexibility at its simplest. We call them Magic Seats.

With one easy lift, the lightweight seats flip up and lock into place. You'll have the option of the entire row up or down, or one up and one down.

We've included an under seat tray to offer you clever additional storage. If something is too heavy to lift into the boot, the folded seats and rear doors offer an alternative lower loading point and area to store your items. One simple movement is all it takes.

BENEFITS:

- High MPG • Low Road Tax • Low CO2 emissions
- Small car but big interior • Has magic seats - fold specially so you can fit large items in back.

“...this variant will offer significant tax benefits, as well as fuel bills low enough to satisfy motorists hit hard by the credit crunch.”
